

Mobile Monitoring Instructions

Access to mobile client

Method 1

Open the CD of this DVR Card . Clip the file XMobilePlay, there are two sub-files. [XMobilePlay_CHS.jar](#) is a Chinese version, and [XMobilePlay_En.jar](#) is an English version . Choose a right one as you need.

CD Root of DVR Card

Two version clients for mobile

Method II

Download the software with your mobile. Input the site as follows: :

<http://www.nvdvr.net/cn.jar> (Chinese Version)

<http://www.nvdvr.net/en.jar> (English Version)

Demo based on normal mobile phone (MTK Platform)

Install mobile client

1, Download client from your mobile.

Input <http://www.nvdvr.net/cn.jar> in Browser

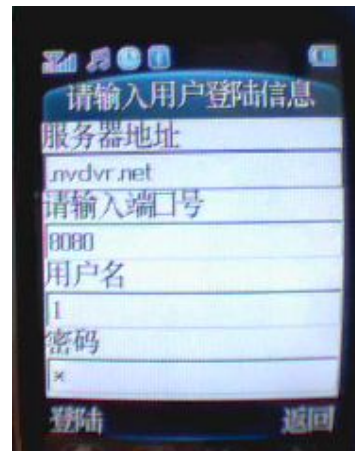

2. Find the JAR file in your mobile (The client copied from CD named XMobiePlay_CHS.jar)

3. Install the client, click "OK"

4. Run this client.

Input your registered domain and port. You also can run our DEMO domain.

Parameters of Demo

Server address : nv920x.nvdvr.net

Input port: 8081 (Can be user-defined, it is recommended to use 8080 or bigger than 8080)

User Name: 1 (This is the DVR server login user name)

Password: 1 (This is the DVR server login password)

Note: The above username and password are not the ones you registered the domain; they are the ones you login the DVR sever

Video image on the mobile

Note: The real image is far better than this one as you see, it is a screenshot through a 300,000 pixel DC. Welcome to download our trial client
